BESKRIVNING

A number of academics and expert practitioners from Sweden, Norway, Denmark, Finland, Estonia, Latvia and Lithuania the Nordic-Baltic Insolvency Network have over the past five years regularly met to discuss draft texts of proposed rules for various blocks of insolvency law topics. The purpose of this activity has been to develop recommendations for a harmonised insolvency law in the Nordic-Baltic region and, with respect to a broader international context, to show that it is possible to arrive at harmonised rules of good quality in this area of law, if the work is based on best practices and earned expertise. This publication contains the results of the work of the Network, in the form of the Nordic-Baltic Recommendations on Insolvency Law in its final version.
